

 DATA ERASURE, DIAGNOSTICS AND GRADING

Erase. Test. Grade. Certify.

Every device, one platform.

Phones, tablets, Macs, PCs, drives, GPUs and smart TVs, processed in parallel from one screen. Every unit leaves with a signed report.

Everything we support, on one page.

One console and one audit trail for every device class on your floor.

→ **Stenfox Orion**

COMING NEXT Apple Watch and AirPods on our own multi-port hub, consoles, servers

Mobile and TV, a whole rack at a time.

Plug devices into your USB hub. Stenfox detects each one, maps it to its physical port and runs your workflow on all of them in parallel.

-  **Certified erase**
Factory reset or full firmware restore, with the outcome verified for every device.
-  **Diagnostics**
Automated hardware checks plus guided pass or fail tests for the operator.
-  **Lock and account checks**
Find My, MDM, SIM lock, Google FRP, Samsung Knox, blacklist and ESN.
-  **Identity and labels**
IMEI and serial scan-and-match, then a printed label and a signed PDF report.

DEVICE VERDICT
iPhone 14 Pro, 256 GB
IMEI 35 541 3

Blacklist / ESN	● Clear
SIM lock	● Unlocked
Find My	● Off
MDM enrolment	● None
IMEI and serial	● Match
Data erase	● Verified

 Signed report and label printed

NEW · SMART TV

TVs on the same bench.

Any brand of TV connects through a small relay unit on your network. It appears in the same dashboard, follows the same workflow and gets the same signed report as your phones.

Samsung LG Vestel Google TV
Android TV Any brand

Macs, PCs and drives, erased, tested and graded.

Each drive gets the erase method its media needs. Each computer is tested before it goes back on sale.

Media-aware erase

NIST 800-88 Clear and Purge, ATA Secure Erase, NVMe Sanitize, crypto-erase, DoD and HMG IS5, verified by read-back.

Lock and enrolment checks

Activation Lock and MDM on Mac. Autopilot, Intune and MDM enrolment on Windows. Flagged before erase.

26 hardware tests

CPU, memory, GPU, SMART, surface scan, battery, thermals, audio, display, keyboard, camera and ports.

Drive health and grade

SMART data and surface scan give every drive a health grade before it is resold.

Mac, end to end

Apple silicon and Intel, from firmware restore to a ready-to-sell machine.

Resale insight

An A, B or C performance tier, plus flags for replaced displays and batteries.

NEW PRODUCT

Stress test and benchmark any GPU.

A dedicated product, separate from computer diagnostics. Every GPU leaves with a score, a grade and a signed report.

EVERY CLASS OF GPU

Integrated

Discrete cards

External

Data centre and AI

● NVIDIA H100 PCIe, 80 GB

ILLUSTRATIVE

CORE TEMPERATURE

GRADE

A

Compute (FP32) 50.8 TFL0PS

Memory bandwidth 1.94 TB/s

VRAM tested 80 / 80 GB

✓ 0 errors

Stress test

Sustained full load, every result verified.

Benchmark

Compute, memory and VRAM, measured and scored.

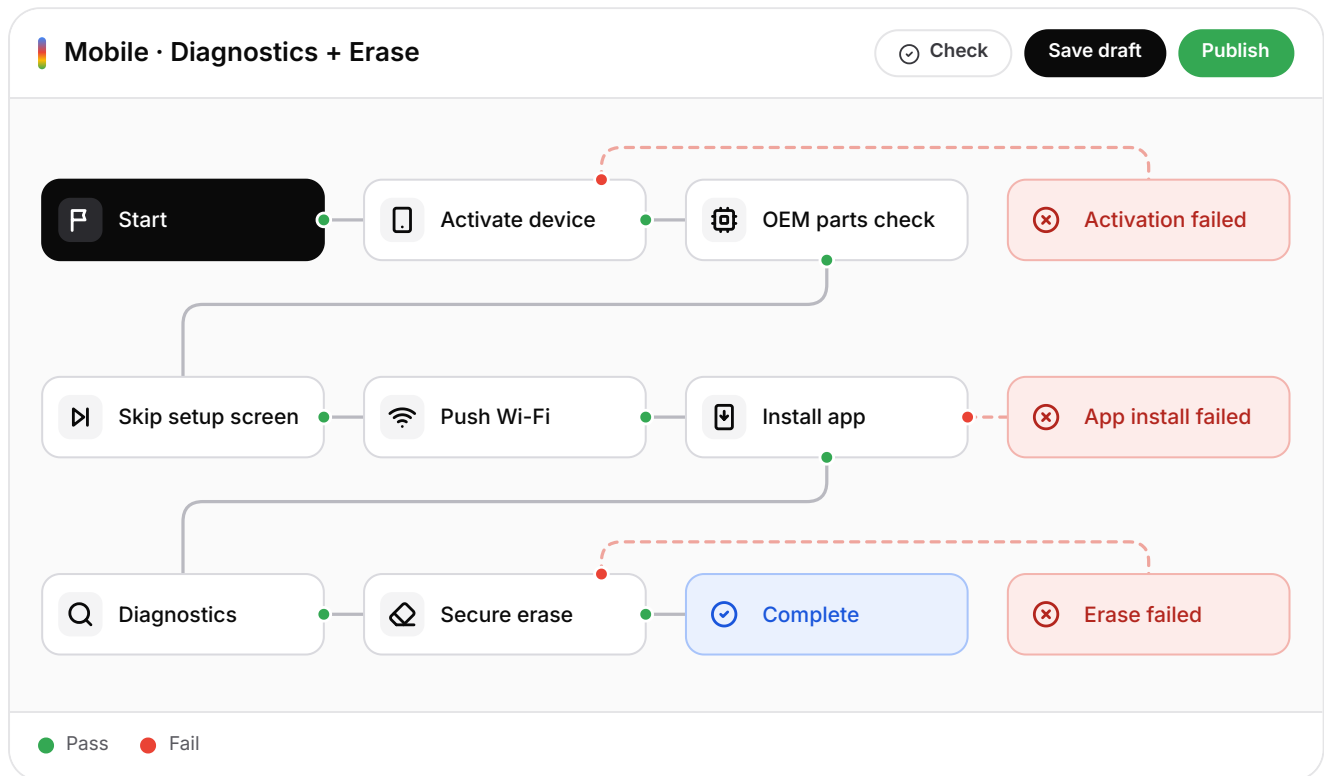

Signed report

Score, grade and fault log for every GPU.

Design the process once. Every bench runs it.

Drag steps onto a canvas in the Stenfox portal. Each step passes or fails, and the device follows the matching path. Publish, and every station picks it up.

Your order

Erase first or test first, with a different path per device type.

Nothing slips through

Every failure is flagged and held with its reason.

Safe to change

Check, save as a draft, then publish. Every version is kept.

STEPS YOU CAN USE

- Activate device
- Firmware flash
- Secure erase
- Diagnostics
- Skip setup screen
- Push Wi-Fi
- Install app
- OEM parts check
- Print label
- Power off
- ESN / blacklist
- SIM lock
- FMIP / FRP
- Jailbreak / root
- MDM check
- Sub-flow

Every device leaves with proof.

When a workflow ends, Stenfox issues a signed report and a label, and keeps the full history in your portal.

Data erasure report

SFX-2026-0914-00482

Device	MacBook Air M2, 512 GB
Serial	C02.....Q6L
Method	NIST 800-88 Purge
Verification	Passed
Operator	Station 04
Completed	14 Sep 2026, 10:42 UTC

 Erasure verified

SHA-256
9f3a...e71c

Signed report

Device, method, verification, operator and time on one PDF.

Label on the unit

A scannable label printed on any standard label printer.

Searchable history

Every device, test and certificate in your cloud portal.

Secure by design

Code-signed applications with verified updates.

REPORTING BUILT AROUND

NIST SP 800-88

IEEE 2883

ADISA

R2v3

GDPR

GSMA

One platform instead of several tools.

One platform

Stenfox Mobile, Computing and GPU share one portal, one audit trail and one report format.

Priced for your volume

We build our own erasure and diagnostics engine, so no third-party fee per device sits in our cost.

Built with operators

You speak directly to the people who build the product, and your feedback shapes what ships next.

NEXT STEP

See it run on your own devices.

- ✓ Live demo on your own devices
- ✓ Pilot in your workshop before you commit
- ✓ Direct line to our engineers
- ✓ Onboarding and training for your team

Tell us what you process and at what volume. We reply within one business day.
